The following is an examiner's statement of reasons for allowance: The prior art does show that it is known to control the differential chamber pressure of a booster piston using a spill valve, but it does not show the use of a pilot-type valve whose backpressure chamber is feed fluid from the booster chamber and through a restriction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312.
